

## A CORRECTION TO "ON CONVEX CONES"

LENNART SANDGREN

The formulation of Theorem 7.2, p. 28, in the paper *On convex cones*, Math. Scand. 2 (1954), pp. 19–28, is incorrect. It should read:

**THEOREM 7.2.** *Let  $\{K_A\}$  be a set of convex bodies in  $E^n$  with the property that any  $n$  of the bodies have a common point. Then through every point  $P$  of  $E^n$  there exists a straight line which intersects all of the bodies  $K_A$ . This line can be chosen so that one of its rays with end point  $P$  intersects  $n$  preassigned bodies  $K_A$ .*
